

ATRACS Integrated Security Solutions

ACCESS CONTROL • ATTENDANCE RECORDING • PHOTO ID CARD PRODUCTION • LOCKER MANAGEMENT • ROLL CALL • ALARM MONITORING • VISITOR MANAGEMENT

ATRACS is an enterprise wide Facilities Information System designed to run on your corporate LAN/ WAN linking remote offices into one integrated system, reducing administration and infrastructure costs.

ATRACS will secure access to your premises, record staff attendance, maintain a check on contractors and log visitors, produce staff Identity cards as well as monitor intruder and building alarms.

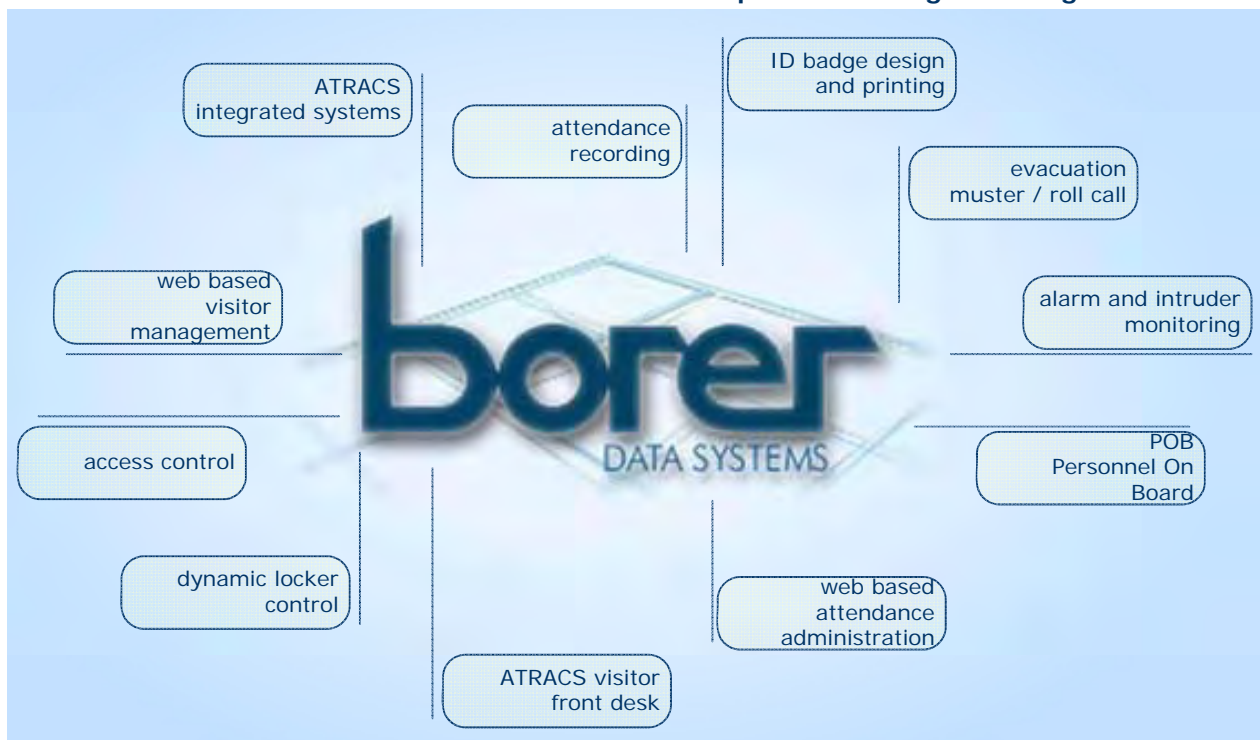

ATRACS uses a SQL database to provide an integrated approach which will:

- **Enhance security** and reduce operating costs by monitoring all sites from security office
- **Multi-user access**, allowing authorised personnel to interrogate the system from any workstation on your network
- **Integrate systems** previously run as stand alone applications
- **Simplify administration** and provide better management reporting by sharing a single data base with several applications

ATRACS Client Server Solutions for single or multi-site applications

- Runs on your Windows NT Server
- Runs over the corporate LAN
- Control from any workstation on your network
- All sites share a common Facilities Information Database
- Web enabled enhancements for Attendance Recording, Access Control and Visitor Management

ATRACS is an enterprise class Integrated Security Solution which offers you the flexibility to develop your system to meet future requirements and to adapt to technological changes.

ATRACS Framework

- True Client Server Application developed using Delphi
- Uses industry standard Microsoft Windows NT/2000/XP operating system
- Back end Database is industry standard Microsoft SQL Server
- Support for ODBC to integrate with external applications
- Web Browser enabled web applications including attendance recording, muster, roll call and visitor management.
- Modular supporting applications including access control, time and attendance, web attendance, visitor management, badge builder, graphical viewer, locker manager, DDVR and personnel on board
- 3 Levels of systems, Express, Professional and Enterprise, to suit any company, and gives room for expansion

ATRACS Systems

ATRACS Express

- Single workstation runs under Win2000 / XP
- Maximum 3840 devices / access doors, 8000 cardholders
- Supports Access Control, Attendance Recording, ID Card Design & production
- Stand alone system that can be used to control a single complex across a LAN / WAN

ATRACS Professional

- As Express, with the addition of
- 4 Client workstation + 1 Server workstation, running under Windows 2000 / XP
- Supports Access Control, Attendance Recording (Flexi time), ID Card Production, Visitor Management, Web Attendance, Visitor Web, Graphical Console, POB, Locker Management
- Maximum 3840 Devices / access doors, 25000 cardholders

ATRACS Enterprise

- As Professional, with the addition of
- Unlimited Client Workstations (Subject to licence) running under Windows 2000 / XP
- Unlimited Devices / access doors, unlimited cardholders

ATRACS Features

Anti Pass back – Active and Passive - Time Embargo - IP Camera Support - Fire Alarm Integration - Event and Alarm monitoring - Live system status display User defined Holidays - System operator privileges can be defined - Full operator audit trail - ODBC Support - Muster and Roll call - Full suite of reporting - Automated Database Management - Allows the use of 2 card technologies - User or System defined pin codes - User defined additional personnel fields - Personnel trace feature - Qualified area support - Enhanced diagnostics - Supports full extended card numbers, i.e. Desfire - User scriptable at device level - User scriptable at System level - Time Recording - User Defined "hot keys"

TCP / IP network based Integrated Security System
